May 19, 1994

To Whom It May Concern:

I have been treating Mr. Otto Snow since 1-7-93. Based on Mr. Snow's statements and information available to me from previous medical reports and letters, his past symptoms (obtained from reports from November 1985), are similar to his current symptoms ie: anxiety, depression, insomnia and stress. Mr. Snow's pattern of symptoms during my treatment relationship with him appear consistant with the symptoms presented in November 1985. If I may be of further assistance please let me know.

Sincerely,

Thair R. Dieffenbach, PhD
